

1090 Hamilton Street Vancouver, B.C. V6B 2R9 Canada

Management's Discussion and Analysis (Unaudited)

For the three months ended March 31, 2020

(Stated in Canadian Dollars)

Dated July 9, 2020

BASIS OF PRESENTATION

The following Management's Discussion and Analysis ("MD&A") provides an overview of the business and operations of Organto Foods Inc. for the three months ended March 31, 2020. This report should be read in conjunction with the Company's March 31, 2020 unaudited condensed interim consolidated financial statements and its December 31, 2019 audited annual consolidated financial statements which have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB").

Except where the context otherwise requires, all references in this MD&A to the "Company", "we", "us", "our" and "Organto" or similar words and phrases relate to Organto Foods Inc. and its subsidiaries, taken together.

All currency amounts are expressed in Canadian dollars unless noted otherwise. In addition, "this quarter" or "current quarter" refers to the three-month period ended March 31, 2020.

This MD&A is dated July 9, 2020.

FORWARD-LOOKING STATEMENTS

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about our ability to carry out our plans and objectives; our ability to open up and sell through traditional and specialty retailers, distributors and other channels in Europe, North America and other markets; our ability to procure required volumes of both conventional and organic produce from strategic third party suppliers; our ability to meet import and export requirements; the availability of equity and other financing on reasonable terms; our ability to realize a return on our investment in the cannabis business; our ability to attract and retain skilled labour, staff and professionals; our ability to operate and/or partner with suppliers in The Netherlands, Europe, North America, Latin America, Africa and elsewhere; the impact of changes in foreign exchange rates on costs and results; transportation and logistics costs; market competition; ongoing relations with our employees and with our business partners; and general business and economic conditions.

We caution you that the foregoing list of important factors and assumptions is not exhaustive. Whether actual results and developments will agree with our expectations and predictions is subject to many risks and uncertainties. Accordingly, there are or will be important factors that could cause our actual results to differ materially from our expectations and predictions. We believe these factors include, but are not limited to, the following:

- we have a limited operating history and may incur further losses until our operating platform achieves scale;
- there is risk in our ability to continue as a going concern due to losses incurred as we build our operating platform combined
 with risk in our negative working capital position and our accumulated deficit, all of which could impact our ability to continue
 operations;
- we may not be able to secure financing required to meet future capital needs to continue operations;
- additional financing may dilute common shareholders or place restrictions on our operations;
- we operate in a competitive global industry and the actions of competitors could impact revenues and profitability;
- we must attract and retain key personnel and professionals to achieve our business objectives;
- our customers are generally not obligated to continue to purchase products from us;

- if we do not manage our supply chain effectively, our operating results may be adversely affected;
- our international operations expose us to risks inherent with the countries where we are doing business;
- our business is subject to numerous environmental and food safety regulations and policies;
- the COVID-19 pandemic has significantly impacted worldwide economic conditions and could have a material effect on our business and resulting financial condition;
- our investment in the cannabis business exposes us to risks associated with laws and regulations governing cannabis, which are still developing in many parts of the world, and could have an impact on our plans to realize a return on our investment
- our stock price may be volatile, which may impact returns to our shareholders;
- our common shares are thinly traded and our shareholders may be unable to sell at or near ask prices, or at all;
- we do not anticipate paying any cash dividends to our common shareholders and as a result, shareholders may only realize a return when their shares are sold; and
- our business is subject to changing regulations related to corporate governance and public disclosure that may increase both our costs and risk of non-compliance.

Consequently, all forward-looking statements made herein are qualified by these cautionary statements and there can be no assurance that our actual results or the developments we anticipate will be realized. The foregoing factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements and the detailed risks and uncertainties that are included in this report.

STRATEGY

Organto is an integrated provider of organic and conventional produce focused on serving a growing socially responsible and health conscious consumer around the globe. Our purpose is "to bring healthy and nutritious fresh organic fruits and vegetables to market by creating sustainable and transparent linkages between growers and end markets." In hand with this our mission is "to be a leading global provider of fresh organic fruits and vegetables utilizing an integrated business model, trusted for driving equitable returns to all parties in the value chain."

We employ a business model that is integrated from the "field to the table". Driven by consumer and retailer demand for healthy and organic food products, we continue to build out a platform to deliver value-added branded and private label and distributed products to meet these needs via an integrated business model with diverse sourcing, logistics, processing, distribution and marketing capabilities, with the objective of providing year-round product supply for many of our products and complete traceability from the table back to the field. Our model is rooted in our commitment to sustainable business practices focused on environmental responsibility and our commitment to the communities where we operate, our people and our shareholders.

As our strategy has evolved, we have repositioned from an asset-heavy, single revenue stream business model to an asset-light, multistream revenue model. In doing so we have exited our own growing, processing and packaging operations in favor of strategic third party relationships, streamlined our cost base, and expanded our organic foods go-to-market channels with additional organic vegetables plus the addition of organic soft fruit, exotic fruit and tropical fruit sold both branded and on a private label and bulk distributed basis. This channel expansion has increased our revenue streams and our presence in key markets, while at the same time significantly deepening our relationships with strategic third-party supply partners.

We believe that the demand for healthy and organic foods will continue to grow for many years and supply availability will be key to this growth being realized. According to the US Organic Trade Association (OTA) sales of organic foods grew 5.0% in 2019 to approximately US\$50.0 billion, growing at a rate that is significantly faster than that of conventional products, and now represents approximately 6% of total food sales. The OTA estimates that 82% of Americans buy organic food at least some of the time and fresh produce continues to be the primary gateway by which consumers enter the organic foods space. Furthermore, over half of all households in the US have purchased organic produce and the fresh produce segment is the largest within the organic segment, representing approximately 15% of all the produce that Americans eat, and approximately 36% of total US organic foods spend. And this is not just a US phenomenon. The organic market in Europe continues to grow. In 2016 the market increased by approximately 11% and reached approximately Euro 33.5 billion in 2017 it increased another 11%, reaching approximately Euro 37.3 billion and in 2019 it increased by almost 8% and reached total turnover of Euro 40.7 billion. Globally European countries account for the highest share of organic food sales as a percentage of total food sales, with demand for organic foods increasing around the globe. Further,

according to a research report completed by Zion Market Research, the global organic food and beverage market is expected to grow to US \$323.1 billion by 2024, a CAGR of 14.56% over the period of 2017-2024.

It is our belief in these growing markets and consumer trends, combined with our efforts to build an efficient year-round supply platform for many of our products that underlies our strategic focus and our mission to be a leading integrated organic brand serving a growing socially responsible and health conscious consumer around the globe.

Our long-term strategic priorities are centered on three key strategic pillars: Supply, Brand and Infrastructure.

- * Supply development of year-round integrated supply chain capabilities;
- * Brand building the Organto brand as a leading brand with retailers and food consumers; and
- * Infrastructure responsibly building-out the organization to allow the business to scale as required.

In hand with our private label and distributed product capabilities, we have developed a branded go-to-market strategy under the Organto "I am Organic" brand for our organic vegetables and fruits. We believe in our ability to drive a differentiated branded products strategy for our food product offerings based on our assessment of market demand combined with our development of year-round supply capabilities for many of our value-added products. In hand with our branded products focus, we also work with retail and distribution partners to provide value-added private label and bulk distributed offerings, with the objective of maximizing efficiencies while creating category demand for our brand. Our organic foods products are initially being marketed to specific European customers and will be followed by introduction to other food markets as deemed appropriate.

We also believe that the global cannabis industry will grow worldwide as countries around the world move to legalize and decriminalize the use of cannabis for both medicinal and recreational use. Legal cannabis is gaining traction due to very high demand among consumers, scientific evidence supporting the medical and social benefits of cannabis and increasing legalization of recreational or medicinal cannabis in various countries. As a result, we believe that our investment in Xebra Brands Ltd. offers attractive return potential, which when realized can be deployed to grow our organic foods business.

HISTORY AND OPERATIONS

In March 2014 Agricola Nuova Terra S.A. ("Agricola"), a privately-owned business, commenced operations to build out a global year-round supply platform focused on the production and distribution of fresh vegetables.

On November 30, 2015, Agricola completed a reverse takeover (the "RTO") of Columbus Exploration Corporation ("Columbus Exploration"). Columbus Exploration was incorporated on May 18, 2007 under the laws of the Province of British Columbia, Canada. Upon completion of the RTO, Columbus Exploration changed its name to Organto Foods Inc., and Agricola became a wholly-owned subsidiary of Organto Foods Inc. On March 21, 2016, Agricola changed its name to Organto Guatemala, Sociedad Anonima ("Organto Guatemala").

The name change to Organto Foods Inc. was completed to better reflect our focus on strategic sourcing and supply of healthy and organic vegetables and fruits along with our commitment to sustainable and socially conscious business practices. While we have operated our own growing operations in the past in both Guatemala and Argentina, processing operations in Guatemala and packaging operations in the Netherlands, we have exited these operations and our focus now is on working with strategic third-party growers and service providers in Latin America, Africa, Europe and other growing regions in order to grow our business and drive an asset light business model. Products are currently being commercialized in European markets.

In November 2018 we completed the acquisition of Medicannabis, SAS, a privately held Colombian medicinal cannabis company that was a late-stage applicant to enable it to cultivate and process cannabis in Colombia.

In June 2019 we entered into a share purchase agreement to sell our shares of Medicannabis SAS and related intellectual property to Xebra Brands Ltd. for a combination of shares of Xebra, cash and forgiveness of debt. Xebra is an emerging, privately held Canadian cannabis company developing high-margin cannabis-based consumer products, with a major focus on cannabis-infused beverages and health and wellness products. Xebra intends to seek a public listing when market conditions prevail. We received shareholder approval and TSX-V acceptance of this transaction in October 2019.

Our head office is located at 1090 Hamilton Street, Vancouver, British Columbia, Canada and we have a sales, logistics and administration office in Breda, the Netherlands. Regional satellite offices are located in Mexico, Guatemala, Argentina and the USA.

OUTSTANDING SHARE DATA

Our common shares are listed for trading on the TSX Venture Exchange ("TSXV") under the trading symbol "OGO" and are quoted on the OTC Markets under the symbol "OGOFF".

We have authorized capital of an unlimited number of common shares without par value. We have the following capital structure as at the date of this MD&A and March 31, 2020:

	July 9, 2020	March 31, 2020
Common shares issued *	195,094,834	165,016,934
Share purchase options outstanding (\$0.07-\$0.20)	12,000,000	13,010,000
Warrants (\$0.065-\$0.20) **	18,898,014	5,500,000

- * Included in issued common shares are 5,873,257 common shares which will be cancelled upon completion of the final documentation necessary to complete the sale of our processing plant in Guatemala.
- ** The 5,500,000 warrants outstanding at December 31, 2019 expired unexercised in May 2020.

See "Liquidity and Capital Resources" for further information.

RECENT DEVELOPMENTS

Corporate

In May and June 2020 the Company issued convertible promissory notes totalling \$2,075,300. These convertible notes are for a period of two years, carry an annual interest rate of 10 % (payable annually), and will be convertible into common shares of Organto at a price of \$0.05 per share for the first year and \$0.10 per share for the second year. If, after four months from the date of issuance of the convertible notes, the volume-weighted average closing price of Organto's common shares as traded on the TSXV is equal to or greater than \$0.15 for 10 consecutive trading days or more, Organto may, in its sole discretion, accelerate conversion of the convertible notes. There is no prepayment penalty. Any shares issued upon the conversion of the convertible notes will be subject to a hold periods expiring in September and October 2020. The Company paid finder's fees of \$22,330 in cash and issued 223,300 broker warrants in connection with these convertible notes. The broker warrants are for a term of two years with an exercise price of \$0.10 per share. \$677,500 of these convertible notes were issued to settle \$74,550 of the secured interest-bearing loans and associated accrued interest. \$245,750 of these convertible notes were issued to settle \$161,150 of unsecured non-interest-bearing loans and \$84,600 of accounts payable.

In May 2020 the Company issued 14,000,000 equity units for proceeds of \$700,000 and 16,077,900 units for proceeds of \$803,895 in June 2020. Each equity unit consisted of one common share and one-half common share purchase warrant. Each full warrant entitles the holder thereof to acquire one common share at a price per warrant share of \$0.10 until May 2022 and June 2022. If, at any time after four months from the date of issue, the closing price of the Company's common shares as traded on the TSX-V is equal to or greater than \$0.15 for 10 consecutive trading days or more, the Company may, in its sole discretion, accelerate conversion of the warrants. The 14,000,000 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in September 2020 while the 16,077,900 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in October 2020. \$60,000 of the June 2020 equity issued was to settle secured interest-bearing loans which were due July 3, 2020.

In April 2020 the Company entered into agreements to extend the secured, interest bearing loans of \$419,100 as follows: \$211,500 of the loans which were to mature in April 2020 and \$72,600 of the loans which were to mature in June 2020 will now mature on October 3, 2020 and December 13, 2020 respectively, other than notes settled as part of the above referenced convertible note and equity financings. The remaining \$135,000 of the loans which were to mature in April 2020 will now mature on July 3, 2020. No other changes were made to the terms of these loans. The interest-bearing loans were originally issued In December 2019 certain arm's-length and non-arm's-length lenders and bear interest at a rate of 12 per cent per annum with interest due at maturity. The lenders received 2,127,738 warrants with each warrant being exercisable for a period of 12 months at an exercise price of \$0.065 per share. Any shares issued upon the exercise of the warrants will be subject to a hold period of four months ending in June 2020. The promissory notes are secured by shares of Xebra Brands Ltd. currently owned by Organto. We did not pay any finders' fees or commissions associated with this bridge loan financing and there is no penalty for early repayment.

In April 2020 the Company entered into an agreement to extend the unsecured, interest bearing loans of \$558,199 through March 15, 2021. In June 2020 the maturity date was further extended to October 1, 2021. These loans now carry an annual interest rate of 12% and will be subject to monthly principal and interest payments in the amount of \$12,500 commencing the first month following the completion of the Company's convertible note financing. These loans are subject to additional lump sum payments based on funds raised via equity financings, warrant exercises and proceeds from funds raised from the disposition of the Company's investment securities. The Company will also grant 1.5 million warrants to the lender for a period through October 1, 2021 with an exercise price of \$0.065 per share.

In February 2020, the Company issued 2,135,764 warrants in connection with the \$419,100 of secured interest-bearing loans issued in late 2019. These warrants are exercisable for a period of 12 months at an exercise price of \$0.065 per share. Any shares issued upon the exercise of the warrants will be subject to a hold period of four months ending in June 2020. The interest-bearing loans were originally issued In December 2019 certain arm's-length and non-arm's-length lenders and bear interest at a rate of 12 per cent per annum with interest due at maturity. Any shares issued upon the exercise of the warrants will be subject to a hold period of four months ending in June 2020. The promissory notes are secured by shares of Xebra Brands Ltd. currently owned by Organto. We did not pay any finders' fees or commissions associated with this bridge loan financing and there is no penalty for early repayment.

In December 2019 we completed the sale of our shares of Medicannabis and related intellectual property ("IP") upon receipt of shareholder approval and TSXV acceptance. We originally entered into a share purchase agreement in June 2019 to sell our shares of Medicannabis and IP consisting of licenses and seed and cultivar rights to Xebra Brands Ltd. ("Xebra") for a combination of shares of Xebra, cash and forgiveness of debt. Xebra is an emerging, privately held Canadian cannabis company developing high-margin cannabis-based consumer products, with a major focus on cannabis-infused beverages and health and wellness products. Under the terms of the agreement, the Company, together with the former shareholders and certain advisers of Medicannabis received a total of 10 million common shares of Xebra, with the Company receiving 7,124,630 common shares and the former shareholders and advisers of Medicannabis receiving 2,875,370 common shares. Upon receipt of these Xebra shares in December 2019, the former shareholders and advisers of Medicannabis returned the 7,461,538 common shares of the Company previously issued as part of the acquisition of Medicannabis and these shares were cancelled. We received cash proceeds of \$321,077 in July 2019. In addition to the cash proceeds, promissory notes of \$600,000 due by the Company to Xebra were forgiven and Xebra assumed all outstanding debts and obligations of Medicannabis. The company has also been granted a right of first refusal ("ROFR") to distribute Xebra's cannabis products throughout Europe. No value has been attributed to the ROFR given the uncertainty of when or if the Company can begin profitably distributing Xebra products in Europe.

In November 2019 we completed shares-for-debt transactions and issued 2,027,579 common shares of the Company at prices ranging from \$0.05 to \$0.065 per share to settle debt in the amount of \$123,548. Of this debt, \$12,500 was for management fees to an employee incurred during the period June, 2018, to May, 2019. The balance of \$111,048 was for products and services provided to the company in 2018. The shares issued under these shares-for-debt settlements have hold periods ending between April 11, 2020, and December 11, 2020.

In July 2019 we announced that Alejandro Maldonado, an agricultural veteran in Mexico had agreed to join the Organto board of directors, and this appointment was subsequently confirmed in December 2019. Jeff Klenda, a current member of the board of directors stepped down on the same date. Mr. Alejandro Maldonado is President and Chairman of Alpasa Farms, a strategic supply partner of Organto, and one of the largest exporters of blueberries, blackberries and figs from Mexico. Alpasa is also a strategic investor in Organto. He is the President of the Berry Growers Association of Mexico and his family has deep roots in the Mexican avocado industry, being one of the largest producers of avocados from the Michoacán region of Mexico. He is a current delegate for the Association of Producers and Packers of Avocado in Mexico (APEAM), a private, non-profit association made up of avocado exporters and packers; and the only cooperative recognized by the USDA and SAGARPA. His deep industry knowledge and supply chain expertise is expected to be an invaluable asset to Organto. Mr. Maldonado's appointment became effective in December 2019.

In April 2019 we entered into an agreement to extend short-term loans payable in the amount of \$647,408. Under the terms of the extension all outstanding amounts were extended one-year from the date of the initial loan and will be payable on the expiry date. Commencing May 15, 2019 and each month thereafter, the Company agreed to make equal monthly payments of \$8,632 reflecting principal and interest and will make lump some payments based on funds raised via equity financings, warrant exercises and proceeds from potential funds raised in relation to the Company's medicinal cannabis assets. Should the Company exit cannabis operations any outstanding amounts under these short-term loans will be immediately due and payable.

In March 2019 we entered into an agreement to sell our processing plant and related assets, including land, buildings and processing equipment, in Guatemala, to Organizacion de Marcadeo SA (Omega), a company controlled by Arturo Bickford and Jorge Guzman Efrain. Under the terms of the agreement Omega acquired the assets in an arm's-length transaction on an as-is basis for consideration

of \$935,450. Consideration was paid through the discharge of certain loans from Omega and related parties to the Company in the amount of \$428,782 (US\$314,647), cancellation of 5,873,257 common shares of the Company, and the assumption of an interest-free note payable from Omega in the amount of \$67,174 (US\$56,628), due on the second anniversary of the closing date and secured by a lien on the assets. At March 31, 2019 the fair value of the shares to be cancelled was determined to be \$440,494 and the fair value of the interest-free note payable was determined to be \$66,174. Shareholder approval was received for this transaction and the Company is currently working to finalize cancellation of the common shares.

In January 2019, the Company established a revolving credit facility with a Mexican bank for up to US\$500,000. Interest is payable monthly at 12% on any funds advanced. A one-time fee of US\$5,000 was paid to establish this facility. A director of the Company has provided a guarantee for this revolving credit facility which was settled as part of the June 2020 convertible note financing.

In December 2018, we settled debts in the amount of \$345,000 with Columbus Gold Corp., a related party, and two of our directors arising from services provided to Organto during the period December 2015, through May 2018. A total of 2,924,294 common shares were issued.

We also issued a total of 1,066,666 common shares to a former officer as full and final settlement for amounts payable of US\$78,691 and 100,000 common shares to a former employee to settle \$7,000 for fees owed in December 2018.

In November 2018 the Company completed a non-brokered private placement of 11,000,000 units at a price of \$0.10 per unit for total proceeds of \$1,100,000. Each unit consisted of one common share and one-half warrant, with each full warrant exercisable to purchase one additional common share at a price of \$0.20 for a period of 18 months after the closing date. The exercise date of the warrants issued is subject to acceleration in the event that the closing price of common shares on the TSX Venture Exchange is greater than or equal to \$0.25 per share for a period of 10 consecutive trading days and such acceleration event occurs any time after the expiration of a four-month hold period applicable to the securities issued. These warrants expired unexercised during the second quarter of 2020.

In August 2018 the Company completed a non-brokered private placement of 20 million units at a price of \$0.08 per unit. Total proceeds of \$1,600,000 were received: \$657,683 in June 2018 and \$942,317 in July and August 2018. Each unit consisted of one common share and one-half warrant, with each full warrant exercisable to purchase one additional common share at a price of \$0.15 per share for a period of 12 months after the closing date. The exercise date of the warrants issued was subject to acceleration in the event that the closing price of common shares on the TSX Venture Exchange was greater than or equal to \$0.25 per share for a period of 10 consecutive trading days and such acceleration event occurred any time after the expiration of a four-month hold period applicable to the securities issued. These warrants expired unexercised during the third quarter of 2019.

In addition to our efforts to transition from an asset heavy and single revenue stream business model to an asset light and multi revenue stream business model, we have also endeavoured to strengthen our balance sheet. During 2018, we entered into agreements which resulted in the elimination of over \$3 million of debt and payables through the early conversion of convertible debentures, the settlement of a convertible loan and shares for debt settlements.

In July 2018 the Company reached an agreement with the holders of the convertible debentures to convert the debentures, plus accrued interest and related conversion fees, into common shares of the Company. As part of this agreement, the conversion terms were modified such that the principal amount of the debentures would be converted at \$0.185 per share instead of the original \$0.35 per share and interest would be converted at \$0.10 per share instead of being paid in cash. As a result of this modification, the Company recognized a loss of \$308,674 being the difference between the fair value of the shares the debenture holders received on conversion and the fair value of the consideration the debenture holders would have received under the original terms. The Company issued a total of 13,330,262 common shares to the holders of the debentures, comprising 11,000,000 common shares issued to convert the face value of the debentures at a conversion price of \$0.185 per common share, and 2,330,262 common shares to convert accrued interest and related conversion fees at a conversion price of \$0.10 per common share.

In June 2018 we settled our US\$590,000 convertible loan. The loan provided for automatic conversion at a conversion price of \$0.33 per common share in the event the company completed an equity financing resulting in gross proceeds of at least \$5 million. As a result of the Company's private placement in 2017 for gross proceeds greater than \$5 million, the Company converted the convertible loan. The Company incurred \$22,135 in costs while converting this loan and these costs, together with accrued interest and the loan principal, were paid by issuing 2,269,230 common shares in June 2018.

We issued share purchase warrants as part of our private placements in 2017 and in August 2018 we adjusted the pricing of the following share purchase warrants:

- 12,699,634 share purchase warrants originally exercisable at a price of \$0.25 per warrant share until June 20, 2019 were amended to a new exercise price of \$0.17 per warrant share;
- 2,165,208 share purchase warrants originally exercisable at a price of \$0.25 per warrant share until August 3, 2019 were amended to a new exercise price of \$0.17 per warrant share; and
- 19,565,000 share purchase warrants originally exercisable at a price of \$0.25 per warrant share until September 11, 2019 were amended to a new exercise price of \$0.17 per warrant share.

These warrants expired unexercised during the third quarter of 2019.

Foods Division

As our strategy has evolved, we have repositioned our organic foods platform shifting from an asset heavy, single revenue stream business model, to an asset light, multi-stream business model. We believe we have made important progress in this regard, exiting Company-owned growing operations, selling our processing facilities in Guatemala and exiting Company operated packaging operations in the Netherlands, all in favor of strategic sourcing arrangements with grower partners in Peru, Argentina, Mexico, Morocco, Colombia, Italy, Zimbabwe and others and third party processing and packaging arrangements with globally positioned strategic partners. We have also streamlined our cost base and expanded our product offering from high-value organic vegetables including organic green beans, sugar snaps and snow peas to other value-added organic vegetables and fruits including asparagus, avocado, blueberries, ginger, mango and other products. We continue to pursue new strategic supply sources around the globe as we work to complete year-round supply of our core product offerings and also bring new complimentary products to our existing portfolio.

With the repositioning essentially completed late in the first half of 2019, commercial operations ramped up in the second half with third and fourth quarter revenues and gross profits both quarterly records for the Company. All revenues were realized in European markets with sales of asparagus, avocado, mango and others to customers in the Netherlands, Belgium, United Kingdom, Germany, France, Spain, Russia, Sweden, Norway and Denmark with supply from both Latin America, Africa and Europe. And this momentum has continued into the first half of 2020.

In March 2020 we provided first quarter 2020 revenue guidance of \$1.6 million to \$1.65 million, a first quarter revenue record for the Company and an increase of approximately 1,200% versus the same quarter in the prior year. And in May 2020 we provide second quarter 2020 revenue guidance of \$2.0 to \$2.2 million, representing the largest quarterly revenues in the Company's history and an increase of approximately 3,300% versus the same quarter in the prior year. We also announced that we expect to exit 2020 with a revenue run rate of \$20 million and a cash-flow breakeven run rate as well.

In January 2020 we expanded our avocado supply chain with the addition of a strategic grower based in Morocco. With the addition of supply from Morocco, our avocado supply chain now includes supply from Colombia, South Africa, Mexico and Morocco, for sale to customers throughout Europe. Shipments from this supplier commenced the last week of December with product available for commercial distribution the second week of January. Morocco's close proximity to Europe enables Organto to sell these avocados in European markets approximately a week following harvesting and processing, much sooner than the three to five weeks required for product delivered from Latin American markets. Shipments are scheduled to run for the course of the Moroccan season which is expected to end in late March 2020 with supply then expected to commence from Latin American sources.

In September 2019 we announced that shipments of avocados out of Colombia commenced for commercial distribution in European markets. We began receiving weekly volumes of up to approximately 20,000 kilograms as demand dictated. Shipments will run for the duration of the Colombian season and end in February, 2020.

We also announced in September 2019 that sales of organic blueberries out of Argentina for sale in European markets was to begin. Organic blueberries were our largest selling product in 2018 and represented the company's first sales of organic soft fruit, a key step in the expansion of our year-round value-added organic fruits and vegetables product offering. Sales continued through the end of 2019, although at lower volumes than the prior year due to market conditions. Even so, we continue to develop a year-round organic blueberry supply program that, once fully implemented, is expected to include supply from strategic growers located in Argentina, Mexico, Peru and other locations.

In late 2018, we entered into a five-year agreement with a supply partner in Zimbabwe, whereby we will have exclusive sales rights for certain organic products produced by the supply partner, initially focused on value-added year-round organic vegetables, including organic green beans, organic snow peas and organic sugar snaps. Our strategic supply partner in Zimbabwe is an established supplier of conventional and organic fruits and vegetables and in March 2019 received organic certification for lands to be devoted to exclusive production of organic vegetables for Organto. The certifications from Eco-Cert SA cover two growing operations located in separate

provinces offering diverse climatic features, critical as year-round supply of value-added vegetables is established. During 2019 we successfully test marketed these products, and going forward we plan to ramp-up this program as funds become available to adequately finance this opportunity.

Sales of organic avocados began in the October 2018 after the establishment of our Mexican subsidiary. Initial shipments were from Mexico to customers in Germany and the Netherlands. The initial shipments were almost fully sold in advance of shipping, indicative of the strong demand for organic avocado. Even so, while our global avocado program has performed well, to date our avocado program from Mexico has not performed as well as we initially expected as we experienced quality issues due to shipping problems in late 2018 and early 2019. We remain very optimistic that supply of avocado from Mexican sources remains a key part of our long-term growth plans.

Sales of organic blueberries to European customers began in September 2018 and were our first sales of an organic soft fruit. Initial sales of organic blueberries were on a seasonal basis through December 2018 from product supplied from Argentina. Our goal is to develop a year-round product offering including supply from Mexico plus additional supply from Peru. Sales of organic blueberries recommenced in September 2019, but as noted, at lower levels due to market conditions.

In October 2018 we began sales to a European on-line retailer, representing the Company's first commercial activities in Europe in the fast-growing on-line channel. Organic blueberries and organic asparagus were the first products available for sale to the on-line retailer, and the customer continues to order on a regular basis from the Company.

Sales of organic asparagus started in September 2018 with sales to customers in the Netherlands and other European countries. Initial supply was from Peru and volumes have increased as the market has been developed. The Company continues to expand supply sources to round out year-round market supply capabilities and we have added supply from Italy and Argentina to this point.

In September 2018 we closed our owned and operated receiving and packaging facility in Amsterdam after entering into an agreement with an established third party who provides a wide range of logistic services for fruits and vegetables, including quality management, receiving, sorting, repacking and warehousing. The closure of our facility in Amsterdam was part of our plan to move from primarily a fixed cost to a variable cost model.

Cannabis Division

In November 2018 we completed the acquisition of 100 per cent of the outstanding shares of Medicannabis SAS, a privately held Colombian medicinal cannabis company that is a late-stage applicant for licences to enable it to cultivate and process cannabis in Colombia. Shareholder approval for this transaction has been received. We allocated the purchase price of \$25,051 to the license applications.

In April 2019 we received final acceptance of the TSX Venture Exchange and issued 7,000,000 common shares ("Acquisition Shares") to the original shareholders of Medicannabis as part of the terms of the acquisition agreement which required these shares be issued upon receipt of a cannabis cultivation license that was received in January 2019. In addition, the Company issued 461,538 common shares ("Finder's Shares") as a finder's fee in accordance with the policies of the TSX Venture Exchange. The Acquisition Shares and Finder's Shares were subject to a four month hold period under applicable securities regulations which expired on August 8, 2019 and are also subject to contractual release limitations over a three-year period. A value of \$1,193,846 was initially attributed to the shares issued and this amount was included in licenses on our balance sheet.

In June 2019 we entered into a share purchase agreement to sell our shares of Medicannabis and related intellectual property ("IP") consisting of licenses and seed and cultivar rights to Xebra Brands Ltd. ("Xebra") for a combination of shares of Xebra, cash and forgiveness of debt. Xebra is an emerging, privately held Canadian cannabis company developing high-margin cannabis-based consumer products, with a major focus on cannabis-infused beverages and health and wellness products. Under the terms of the agreement, the Company, together with the former shareholders and certain advisers of Medicannabis received a total of 10 million common shares of Xebra, with the Company receiving 7,124,630 common shares and the former shareholders and advisers of Medicannabis receiving 2,875,370 common shares. Upon receipt of these Xebra shares the former shareholders and advisers of Medicannabis returned the 7,461,538 common shares of the Company previously issued as part of the acquisition of Medicannabis and these shares were cancelled. We received cash proceeds of \$321,077 in July 2019. In addition to the cash proceeds, promissory notes of \$600,000 due by the Company to Xebra were forgiven and Xebra assumed all outstanding debts and obligations of Medicannabis. The Company has also been granted a right of first refusal ("ROFR") to distribute Xebra's cannabis products throughout Europe. No value has been attributed to the ROFR given the uncertainty of when or if the Company can begin profitably distributing

Xebra products in Europe. In October 2019 we received TSXV acceptance and shareholder approval for this transaction and in December 2019 we completed the necessary documentation and concluded the sale.

With the sale of the cannabis assets, we no longer have a cannabis operating division.

FINANCIAL RESULTS

For the purposes of the information presented, the "Company" is defined as the consolidated entity.

Critical Accounting Estimates

The preparation of financial statements in accordance with IFRS is the responsibility of management and requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Our management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is risk of material adjustments to assets and liabilities in future accounting periods include estimates of useful lives of depreciated and amortized assets, the valuation of inventory which includes estimates with regards to the allocation of overhead and determining the net realizable value, assumptions used in determination of the fair value of share-based payments, the recoverability and measurement of deferred tax assets, and the allocation of the purchase price associated with the acquisition of a business.

The preparation of financial statements in accordance with IFRS requires us to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in preparing our financial statements include the assumption that we will continue as a going concern, classification of expenditures and the classification of financial instruments.

Changes in Accounting Policies and Standards

A number of new standards, and amendments to standards and interpretations, have been applied or considered in preparing these consolidated financial statements while other standards will come into effect in the future. Those that may be applicable to us are as follows:

(a) IFRS 16 – Leases ("IFRS 16")

IFRS 16 replaces IAS 17 "Leases" and the related interpretative guidance. IFRS 16 applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, IFRS 16 introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting is not substantially changed. The standard is effective for annual periods beginning on or after January 1, 2019. The Company does not have any agreements that meet the definition of a lease and the application of IFRS 16 has not had a material impact on the Company's financial statements.

(b) Other

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

Review of Financial Results - First Quarter

We realized a net loss of \$643,698 during the first quarter, compared to a net loss of \$775,888 during the same period in the prior year. The improved results were primarily due to increased revenues and gross profit. Our net loss in the first quarter of the prior year included a loss from discontinued operations of \$167,772 that we realized on our cannabis division operations.

Product revenues for the three months ended March 31, 2020 were \$1,609,820 as compared to \$130,999 during the same period in the prior year, an approximate 1,100% increase. These revenues are a first quarter revenue record for the Company. Sales of vegetable and fruit products, including fresh organic asparagus, avocado, mango and others, continued to grow and were sold to a variety of customers in the Netherlands, Belgium, United Kingdom, Germany, France, Spain, Russia, Sweden, Norway and Denmark.

We realized a quarterly gross profit of \$160,477 or approximately 10% of revenues in the first quarter of 2020 which was a first quarter record, as compared to a gross loss of \$31,131 during the same period in the prior year. This is indicative of the solid progress made as the Company's operating model has been repositioned to an asset light business model and revenue streams and supply sources expanded in hand with a rationalized cost base.

Selling, general and administration expenses of \$186,494 this quarter were slightly higher than the \$179,889 from the same quarter of the prior year but within expectations given the greater volume of sales in the quarter.

Management fees in the current quarter were \$148,449 an amount comparable to the last eight quarters.

Labour costs and benefits during the first quarter were \$187,622 and also within expectations given the increased volume of sales. Labour costs have decreased over the last two years as overall staffing levels have been scaled back leading to cost savings from our restructured business model.

We recognized \$63,764 in stock-based compensation in the first quarter of 2020 compared to \$87,469 in the same quarter of 2019. Stock based compensation is calculated using the Black-Scholes option pricing model which requires the input of highly subjective assumptions including expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore does not necessarily provide a reliable single measure of the fair value of the Company's stock options granted

and/or vested during the period. Stock based compensation in the first quarter of 2020 was based on a fair value of \$0.05 per share for the 5,325,000 options granted in December 2019, \$0.04 per share for the 150,000 options granted in June 2019, \$0.06 per share for the 600,000 options granted in June 2018 and \$0.06 per share for the 5,750,000 options granted in December 2018.

Net interest and accretion expense during the current quarter was \$64,941 as compared to \$34,119 for the same quarter of the prior year. Interest in the first quarters of 2020 and 2019 consisted primarily of interest on our bank loan and the interest bearing short-term loans, plus factoring costs. Larger bank and short-term loans balances together with increased commercial activity in 2020 led to the higher expense in 2020. See "Liquidity and Capital Resources" for further information.

We realized other income of \$5,821 in the current quarter as compared to \$nil in the same quarter of 2019. The other income represents proceeds from the sale of an unused subsidiary in Europe.

Foreign exchange gains and losses arise from transactions incurred in currencies other than the functional currency of the Company and its subsidiaries. We realized a foreign exchange loss of \$158,726 this quarter as compared to a loss of \$7,310 during the same quarter last year. Foreign exchange rates experienced large fluctuations in March 2020 as part of the market turmoil caused by the global coronavirus pandemic, particularly the Canadian dollar and the Mexican peso versus the US dollar. Our bank loan and certain of our short-term loans are denominated in US dollars which exposes us to this kind of risk. Both the Canadian dollar and Mexican peso have recovered slightly, though are still well off their December 2019 levels.

Liquidity and Capital Resources

At March 31, 2020, we had cash of \$74,894 and a working capital deficiency of \$4,647,107 compared to \$54,565 and \$4,027,352 respectively, at December 31, 2019.

During the year ended December 31, 2018 the Company received \$818,740 in bridge loans from insiders and certain shareholders. Interest rates ranged from 0% to 8% with interest paid in equal monthly payments totalling \$5,000 per month on all interest-bearing loans. Two of these loans were settled in March 2019 when the Company sold its processing plant in Guatemala. Under the terms of the sale agreement, part of the consideration paid was the discharge of the loans from Omega with maturity dates of March 27, 2019 and April 5, 2019. All loans were unsecured and had a term of one year.

In April 2019 the Company entered into an agreement to extend the remaining bridge loans. Under the terms of the extension all outstanding amounts were extended one-year from the date of the initial loan and will be payable on the new expiry date. Commencing May 15, 2019 and each month thereafter, the Company will make equal monthly payments of \$8,632 consisting of principal and interest and will make lump sum payments based on funds raised via equity financings, warrant exercises and proceeds from potential funds raised in relation to the Company's medicinal cannabis assets. Should the Company completely exit its cannabis investment any outstanding amounts due under these short-term loans will be immediately due and payable. In April 2020 the Company entered into an agreement to further extend the unsecured, interest bearing loans of \$558,199 through March 15, 2021. In June 2020 the maturity date was further extended to October 1, 2021. These loans will now carry an annual interest rate of 12% and will be subject to monthly principal and interest payments in the amount of \$12,500 in July 2020. These loans are subject to additional lump sum payments based on funds raised via equity financings, warrant exercises and proceeds from funds raised from the disposition of the Company's investment securities. The Company will also grant 1.5 million warrants to the lender for a period through October 1, 2021 with an exercise price of \$0.065 per share. One payment of \$8,632 was made in the first quarter of 2020.

During 2019 the Company received \$584,738 in short term loans from a number of parties including officers and directors, some of which are denominated and repayable in US dollars and Euros. Of these loans, \$419,100 are secured by a portion of the Company's investment securities and bear interest at an annual rate 12% for a term of six months. The other loans are interest free, unsecured and have no fixed terms of repayment. During 2019 the Company repaid \$94,085 of the interest free loans. In the first quarter of 2020 an additional \$332,599 was received from officers and directors of which \$280,515 was repaid. A total of \$2,834 in interest was accrued on these 2020 advances. In February 2020 the Company issued 2,135,764 warrants in connection with the \$419,100 of secured interest-bearing loans issued in late 2019. These warrants are exercisable for a period of 12 months at an exercise price of \$0.065 per share. Any shares issued upon the exercise of the warrants will be subject to a hold period of four months ending in June 2020. In April 2020 the Company entered into agreements to extend the secured, interest bearing loans of \$419,100 as follows: \$211,500 of the loans which were to mature in April 2020 and \$72,600 of the loans which were to mature in June 2020 will now mature on October 3, 2020 and December 13, 2020 respectively. The remaining \$135,000 of the loans which were to mature in April 2020 will now mature on July 3, 2020. No other changes were made to the terms of these loans.

In May 2020, \$74,550 of the secured interest-bearing loans and \$161,150 of the unsecured non-interest-bearing loans were settled by issuing convertible promissory notes. \$60,000 of the secured interest-bearing loans were settled in the June 2020 private placement and 1,200,000 common shares and 600,000 warrants were issued.

In May and June 2020 the Company issued convertible promissory notes totalling \$2,075,300. These convertible notes are for a period of two years, carry an annual interest rate of 10 % (payable annually), and will be convertible into common shares of Organto at a price of \$0.05 per share for the first year and \$0.10 per share for the second year. If, after four months from the date of issuance of the convertible notes, the volume-weighted average closing price of Organto's common shares as traded on the TSXV is equal to or greater than \$0.15 for 10 consecutive trading days or more, Organto may, in its sole discretion, accelerate conversion of the convertible notes. There is no prepayment penalty. Any shares issued upon the conversion of the convertible notes will be subject to a hold periods expiring in September and October 2020.

Organto paid a finder's fee of \$22,330 in cash and issued 223,300 broker warrants in connection with these convertible notes. The broker warrants are for a term of two years with an exercise price of \$0.10 per share.

\$677,500 of these convertible notes were issued to settle the US\$500,000 Mexican bank loan. \$74,550 of these convertible notes were issued to settle \$74,550 of the secured interest-bearing loans and associated accrued interest. \$245,750 of these convertible notes were issued to settle \$161,150 of unsecured non-interest-bearing loans and \$84,600 of accounts payable.

The Company issued 14,000,000 units for proceeds of \$700,000 in May 2020 and 16,077,900 units for proceeds of \$803,895 in June 2020. Each unit consists of one common share and one-half common share purchase warrant. Each full warrant entitles the holder thereof to acquire one common share at a price per warrant share of \$0.10 until May 2022 and June 2022. If, at any time after four months from the date of issue, the closing price of Organto's common shares as traded on the TSXV is equal to or greater than \$0.15 for 10 consecutive trading days or more, Organto may, in its sole discretion, accelerate conversion of the warrants. The 14,000,000 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in September 2020 while the 16,077,900 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in October 2020.

The Company signed promissory notes payable to Xebra for cash proceeds of \$114,000 in the first quarter of 2019. In the second quarter of 2019, the Company signed promissory notes payable to Xebra totalling \$486,000 in exchange for cash proceeds of \$396,731 and for Xebra making payments of \$13,150 directly to suppliers on behalf of Organto. These notes were non-interest bearing and due on demand anytime after May 7, 2019. Immediately prior to the sale of its subsidiary Medicannabis, \$55,000 of the short-term loans from the directors noted above and \$21,119 of expense reimbursements due to these directors were assumed by Xebra and then included in the \$600,000 of promissory notes forgiven by Xebra.

In January 2019 we established a revolving line of credit with a Mexican bank for up to US\$500,000. Interest is payable monthly at 12% on funds borrowed and we paid a one-time fee of US\$5,000 to establish this facility. During the first quarter of 2020 we borrowed US\$1,000,000 and repaid US\$500,000 under this facility. Borrowed funds are required to be repaid within 180 days after which they can then be re-borrowed.

Cash used in operating activities for the first quarter of 2020 was \$24,791 all in continuing operations. Cash used in operating activities for the first quarter of 2019 was \$797,042 of which \$625,402 was used in continuing operations and \$168,640 was used in discontinued operations. Cash used in operations consists of cash used to fund the loss for the period and the impact of non-cash items and changes in non-cash working capital.

At March 31, 2020, we had current liabilities of \$5,130,740 (December 2018 - \$4,538,768). An increase in the book value of the US dollar denominated bank and Omega loans was due to the strengthening of the US dollar. Additional short-term loans and larger accounts payable were also reasons for the increase in liabilities this quarter.

We are reliant upon equity and/or debt financings to fund operations until such time as revenues are sufficient to sustain operations.

Financial instruments

The fair value of our financial instruments, financial statement classification and associated risks are presented in the following table.

			Fair value at March 31, 2020
Financial instrument	Basis of measurement	Associated risks	(\$)
Cash	Fair value through profit or loss	Credit, currency and concentration	74,894
Accounts receivable	Amortized cost	Credit, currency and concentration	313,704
Loan receivable	Amortized cost	Credit and currency	74,299
Investment securities	Fair value through profit or loss	Other price	2,137,389
Accounts payable	Amortized cost	Currency	(3,212,713)
Bank loan	Amortized cost	Currency	(708,500)
Loan due to Omega S.A.	Amortized cost	Currency	(26,073)
Loans payable	Amortized cost	n/a	(1,183,454)
			(2,530,454)

The fair value of our financial instruments including cash, receivables, accounts payable, loan due to Omega and loans payable approximates their carrying value due to the immediate or short-term maturity of these financial instruments. The fair value of the Company's investment securities, which are not publicly traded, was estimated using the price of recent or in-progress funding involving significant financing from external investors.

IFRS 7, Financial Instruments: Disclosure establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Our financial instruments are exposed to certain financial risks. The risk exposures and the impact on our financial instruments at March 31, 2020 are summarized below. The Board of Directors reviews with management the principal risks affecting the Company and the systems that have been put in place to manage these risks.

(a) Credit risk

Credit risk is the risk that the Company will incur a loss due to a customer or third party failing to discharge their obligation due to the Company.

The credit risk exposure on cash is limited to their carrying amounts at the date of the statement of financial position. Cash is held as cash deposits with creditworthy banks in Canada, Europe, Guatemala, Mexico and Argentina. The risk is assessed as low.

The credit risk exposure on receivables is limited to their carrying amounts at the date of the statement of financial position. Trade receivables are mainly from customers in Europe. The risk is assessed as moderate. Other receivables are primarily comprised of VAT credits with a low risk assessment.

(b) Liquidity risk

Liquidity risk arises from the Company's general and capital financing needs. We manage liquidity risk by attempting to maintain sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short term obligations. At March 31, 2020, we had a working capital deficiency of \$4,647,107 (December 31, 2019 – \$4,027,352). Liquidity risk is assessed as high.

To date, the Company has been able to address any shortfalls in meeting our short-term financial demands by turning to equity and debt markets to raise the funding necessary continue operations. We will have to continue to raise funds on these markets until the Company is able to realize consistent profitable operating results.

(c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market.

Our investment securities are exposed to other price risk. The Company's investment in Xebra does not currently have a quoted market price in an active market and is valued at recent private financing price levels. Xebra is planning a public listing when market conditions prevail. The Company manages this risk by keeping in close contact with Xebra and receives regular updates on their operations.

Sensitivity Analysis

A 1% change in interest rates does not have a material effect on our profit or loss and equity.

As our functional currency is the Canadian Dollar, where foreign currency transactions such as the US Dollar, European Euro, Argentine Peso, Mexican peso and Guatemalan Quetzal are converted into Canadian Dollars, changes in exchange rates between these currencies may have an effect on our profit or loss and equity. A +/- 10% change in the exchange rate between those currencies and the Canadian Dollar can affect net income by approximately \$105,000.

Capital Management

When managing capital our objective is to ensure an optimal capital structure is maintained to reduce overall cost of capital and allowing flexibility to respond to changes in working capital requirements.

In the management of capital, we include the components of shareholders' equity as well as cash and receivables.

We manage the capital structure and make adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, we may attempt to issue new shares, acquire or dispose of assets or adjust the amount of cash and investments.

In order to facilitate the management of our capital requirements, we monitor working capital and cash flows regularly. There have been no changes to our capital management policies and procedures since the end of the most recent fiscal year.

OFF-BALANCE SHEET ARRANGEMENTS

During the three months ended March 31, 2020 and up to the date of this report, the Company had no off-balance sheet transactions.

PROPOSED TRANSACTIONS

While the Company is continually reviewing potential opportunities that could enhance shareholder value, there are no proposed transactions that would affect the financial condition, results of operations and cash flows of the Company to report at this time.

RISKS AND UNCERTAINTIES

Risk factors

Our business, operations and financial condition are subject to various risks and uncertainties. Prior to making an investment decision, investors should consider the risks and uncertainties set out below and those described elsewhere in this document, which are in addition to the usual risks associated with an investment in a business engaged in the global production and distribution of organic produce. We believe the risks set out below to be the most significant to potential investors, but do not represent all of the risks associated with an investment in securities of our Company. If any of the identified risks materialize or other additional risks and uncertainties of which we are currently unaware materialize, our assets, liabilities, financial condition, results of operations (including future results of operations), business and business prospects are likely to be materially and adversely affected. These risk factors should be read in conjunction with other information in this report and in other documents that we file from time to time.

Risks Related to Our Business

We have a limited operating history and may incur further losses until our operating platform achieves scale.

Agricola began carrying on business in 2014 and since that time we have built out our operating platform and generated approximately \$11.2 million in revenues and operating losses of approximately \$21.8 million. We are subject to many of the risks common to early-stage enterprises, including costs associated with building out an operating platform prior to volumes coming to scale, undercapitalization, cash shortages, and limitations with respect to personnel, financial, and other resources. There is no assurance that we will be successful in establishing a customer base, that consumers will purchase our products, or that we will begin generating revenues sufficient to cover our operating costs. Our ability to achieve a return on shareholders' investment and the likelihood of its success must be considered in light of the company's early stage of operations.

There is risk in our ability to continue as a going concern due to losses incurred as we build out our operating platform combined with risk in our negative working capital position and our accumulated deficit, all of which could impact our ability to continue operations.

Our independent auditors have added an explanatory paragraph to their audit opinion issued in connection with our financial statements for the years ended December 31, 2019, 2018, 2017, 2016 and 2015 with respect to our ability to continue as a going concern. As discussed in Note 1 to our financial statements for the current year, we have generated operating losses since inception, cash resources are currently insufficient to meet planned business objectives, and thus additional financing will be required to realize the carrying value of our assets and continue operations, which together raises doubt about our ability to continue as a going concern.

We may not be able to secure financing required to meet future capital needs to continue operations.

We will require additional capital to fulfill our contractual obligations and continue development of our product offerings and global operating platform, through either equity or debt financing. Due to business specific or general economic conditions, we may be unable to secure debt or equity financing on terms acceptable to the Company, or at all, at the time when we need such funding. Our inability to raise additional funds on a timely basis would make it difficult to achieve our business objectives and would have a negative impact on our business, financial condition and results of operations.

Additional financing may dilute common shareholders or place restrictions on our operations.

If we raise funds by issuing additional equity or convertible debt securities, the ownership percentages of existing stockholders would be reduced, and the securities that we issue may have rights, preferences or privileges senior to those of the holders of our common stock or may be issued at a discount to the market price of our common stock which would result in dilution to our existing stockholders. If we raise additional funds by issuing debt, the Company may be subject to debt covenants, which could place limitations on our operations including our ability to declare and pay dividends.

We operate in a competitive global food industry and the actions of competitors could impact revenues and profitability.

The agricultural produce industry is intensely competitive in all of its phases. We compete with other companies, some of whom have greater financial resources, larger facilities, more capacity, higher staffing levels, greater economies of scale, pricing advantages, longer operating histories and more established market presences. We may have little or no control over some or all of these competitive factors. If we are unable to effectively respond to these competitive factors, or if the competition in our product markets results in price reductions or decreased demand for our products, our business, results of operations and financial condition may be materially impacted.

We are focusing our business on the production, processing, packing, distribution and marketing of value-added and branded organic produce grown in strategic geographies that will provide us with year-round supply capabilities. As a result of changing consumer preferences and awareness, we believe there is increased demand for organic produce over conventional produce which we believe will be positive for us. Even so, we expect to face competition from new entrants to the organic produce market wanting to participate in this growing category. Our ability to remain competitive will depend to a great extent on our ability to grow our customer base, build our brand, maintain competitive pricing levels, attract strategic third-party growers to cost-effectively supply our operations, manage transportation and delivery logistics, and effectively market our products to our customers. There can be no assurance that we will have sufficient resources to compete successfully with our current or future competitors in these areas, which could have a material adverse effect on our business plan and results of operations.

We must attract and retain key personnel and professionals to achieve our business objectives.

Our success will be largely dependent upon the performance of our management, key employees and professionals. We must compete with other companies both within and outside the food industry to recruit and retain competent employees and contract resources. If we cannot attract and maintain qualified resources to meet our business needs, this could have a material adverse effect on our business. In addition, the Company does not have key man insurance policies and therefore there is a risk that the death or departure of any existing member of management or any key employee or professional could also have a material adverse effect on the Company.

Our customers generally are not obligated to continue purchasing products from us.

Many of our customers buy from us under purchase orders, and we generally do not have long-term agreements with or commitments from these customers for the purchase of our products. We cannot provide assurance that our customers will maintain or increase their sales volumes or orders for the products supplied by us or that we will be able to maintain or add to our existing customer base.

Decreases in our customers' sales volumes or orders for products supplied by us may have a material adverse effect on our business, financial condition or results of operations.

If we do not manage our supply chain effectively, our operating results may be adversely affected.

Our supply chain is complex and subject to a number of risks. We do not directly operate our own growing and processing operations but instead rely on a number of third-party suppliers for the growing, processing, packaging and delivery of certain of our products. Our inability to effectively manage our supply chain could cause our operating costs to rise and our margins to fall. In addition, potential adverse weather conditions and natural disasters add another layer of risk to our supply chain. We must continuously monitor our inventory and product mix against forecasted demand or risk having inadequate supplies to meet customer demand as well as having too much inventory that could reach its expiration date. If we are unable to manage our supply chain efficiently and ensure that our products are available to meet customer demand, our operating costs could increase and our margins could fall.

Our international operations expose us to additional risks inherent with the countries where we are doing business.

We operate in various foreign jurisdictions around the world. These international operations expose us to risks inherent in doing business abroad including exposure to local economic conditions, foreign exchange rate fluctuations and currency controls, investment restrictions or requirements, export and import restrictions, compliance with anti-corruption and anti-bribery laws, compliance with export controls and economic sanctions laws, and unforeseen events such as natural disasters, terrorism or political and civil unrest. As we continue to expand our business globally, we may have difficulty anticipating and effectively managing these and other risks, thus materially impacting our business, financial condition and results of operations.

Our business is subject to numerous environmental and food safety regulations and policies.

Our operations are subject to environmental and food safety regulations and policies in the areas where we operate. Changes in any government laws or regulations applicable to our operations could increase our compliance costs, negatively affect our ability to sell certain products or otherwise adversely affect our results of operations. While we believe we are in compliance with all laws and regulations applicable to our operations, we cannot be assured that we have been, or will at all times be, in compliance with all environmental and food safety requirements, or that we will not incur material costs or liabilities in connection with these requirements. Our failure to comply with any laws, regulations or policies applicable to our business could lead to penalties, loss of our ability to sell certain of our products, possible product recalls and others, any of which could have a material impact on our business, financial condition and results of operations.

The COVID-19 pandemic has significantly impacted worldwide economic conditions and could have a material effect on our business and resulting financial condition.

Our business and financial results may be negatively impacted by the 2019 novel coronavirus (COVID-19) pandemic, including causing significant volatility in customer demand for our products, changes in consumer behavior and preference, disruptions in our global supply chain operations, disruptions to our business expansion plans, limitations on our employee and service provider's ability to work and travel, significant changes in the economic conditions in markets in which we operate and related currency and commodity volatility, and pressure on our liquidity. Despite our efforts to manage these impacts, they also depend on factors beyond our knowledge or control, including the duration and severity of the COVID-19 pandemic and actions taken to control its spread and mitigate its public health effects. As a result, we cannot reasonably estimate the full impact of the COVID-19 pandemic on our business and financial results, but the impact could be material and last for an extended period of time.

Our investment in the cannabis business exposes us to risks associated with laws and regulations governing cannabis, which are still developing in many parts of the world, and could have an impact on our plans to realize a return on our investment.

Our investment exposure in the cannabis industry is governed by laws and regulations specific to various countries around the world. Many of these laws and regulations are still being developed, and dependent on the outcome of these, our ability to realize a profitable return could be impacted.

Risks Related to Ownership of Our Securities

Our stock price may be volatile, which may impact returns to our shareholders.

From time to time stock markets experience extreme price and volume fluctuations, which, when combined with general economic and political conditions, could adversely affect the market price for our securities. In addition, the trading price of our common stock may be volatile and could fluctuate widely in response to many factors, including the following, some of which are beyond our control:

- variations in our operating results;
- changes in expectations of our future financial performance, including financial estimates by securities analysts and investors;
- changes in operating and stock price performance of other companies in our industry;
- additions or departures of key personnel; and
- future sales of our common stock.

Our common shares are thinly traded and our shareholders may be unable to sell at or near ask prices, or at all.

We cannot predict the extent to which an active public market for trading our common stock will be sustained. Our shares have historically been thinly-traded meaning that the number of persons interested in purchasing our common shares at or near bid prices at a certain given time may have been relatively small or non-existent.

This situation is attributable to a number of factors, including the fact that we are a smaller company in its development phase which is relatively unknown to stock analysts, stock brokers, institutional investors and others in the investment community who generate or influence sales volume. Even if our Company came to the attention of such persons, those persons may be reluctant to follow, purchase, or recommend the purchase of shares of an unproven company such as ours until such time as we become more seasoned and viable. As a consequence, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a seasoned issuer which has a large and steady volume of trading activity that will generally support continuous trades without an adverse effect on share price. We cannot be assured that a broader or more active public trading market for our common stock will develop or be sustained, or that current trading levels will be sustained.

We do not anticipate paying any cash dividends to our common shareholders and as a result, shareholders may only realize a return when their shares are sold.

We presently do not anticipate that we will pay dividends on any of our common stock in the foreseeable future. If payment of dividends does occur at some point in the future, it would be contingent upon our revenues, earnings and cash flow, if any, capital requirements, and general financial condition. The payment of any common stock dividends will be at the discretion of our Board of Directors. We presently intend to retain all earnings to implement our business plan; accordingly, we do not anticipate the declaration of any dividends for common stock in the foreseeable future.

Our business is subject to changing regulations related to corporate governance and public disclosure that may increase both our costs and the risk of noncompliance.

Because our common stock is publicly traded, we are subject to certain rules and regulations of federal, provincial and financial market exchange entities charged with the protection of investors and the oversight of companies whose securities are publicly traded. These entities have issued requirements and regulations and continue to develop additional regulations and requirements in response to public concerns. Our efforts to comply with these regulations have resulted in, and are likely to continue resulting in, increasing general and administrative expenses. Because new and modified laws, regulations and standards are subject to varying interpretations in many cases due to their lack of specificity, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This evolution may result in continuing uncertainty regarding compliance matters and additional costs necessitated by ongoing revisions to our disclosure and governance practices.

DISCLOSURE AND INTERNAL CONTROLS

Disclosure controls and procedures have been established to provide reasonable assurance that material information relating to the Company is made known to management, particularly during the period in which annual filings are being prepared. Furthermore, internal controls over financial reporting have been established to ensure that the Company's assets are safeguarded and to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS.

The Company has worked to enhance our disclosure controls and procedures through the implementation of the *Internal Control – Integrated Framework (2013 Framework)* control framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission, and the *Control Objectives for Information and Related Technology 5.0* framework Issued by the Information Systems Audit and Control Association for the management and governance of information technology.

Management regularly evaluates the effectiveness of the Company's internal controls and as of March 31, 2020 have concluded that these controls and procedures are effective in providing reasonable assurance that material information relating to the Company is made known to them by others within the Company in a timely manner.

organto

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

1. Nature of operations and going concern

Organto Foods Inc. ("Organto" or "the Company") is engaged in the sourcing, processing, packaging, distribution and marketing of fresh organic and value-added vegetable and fruit products. The Company's common shares are listed for trading on the TSX Venture Exchange ("TSXV") and are traded under the stock symbol "OGO".

Incorporated on May 18, 2007 under the laws of the Province of British Columbia, Canada, and previously known as Columbus Exploration Corporation ("Columbus Exploration"), Organto was formed upon the completion of a reverse takeover of Columbus Exploration by Agricola Nuova Terra Guatemala S.A. ("Agricola") on November 30, 2015, whereby Argricola became a whollyowned subsidiary of Organto. For the purposes of these consolidated financial statements, the "Company" is defined as Organto and its subsidiaries.

In June 2019 Organto entered into a share purchase agreement to sell its shares of Medicannabis S.A.S. ("Medicannabis") and related intellectual property to Xebra Brands Ltd. ("Xebra") for a combination of shares of Xebra, cash and forgiveness of debt. Prior to this agreement, Organto owned 100 per cent of the outstanding shares of Medicannabis, a privately held Colombian company focused on the development of medicinal cannabis. See also notes 7 and 15.

These condensed interim consolidated financial statements have been prepared on a going concern basis which implies that the Company will continue realizing its assets and discharging its liabilities in the normal course of business for the foreseeable future. Should the going concern assumption not continue to be appropriate, further adjustments to carrying values of assets and liabilities may be required. The operations of the Company have historically been funded by the issue of share capital, bank loans, short-term loans and convertible loans. At March 31, 2020, the Company had a working capital deficiency of \$4,647,107 (December 31, 2019 - \$4,027,352) and an accumulated deficit of \$21,813,123 (December 31, 2019 - \$21,169,425). Accordingly, the ability of the Company to realize the carrying value of its assets and continue operations as a going concern is dependent upon its ability to obtain additional financing as needed, continued financial support from related parties, and ultimately on generating future profitable operations. The factors described indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

The Company's head office and principal address is located at 1090 Hamilton Street, Vancouver, British Columbia, V6B 2R9, Canada. The Company has a sales and administration office in Breda, the Netherlands and regional satellite offices are located in Mexico, Guatemala, Argentina and the USA.

2. Basis of presentation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed interim consolidated financial statements have been prepared using the same accounting policies and methods of computation as the most recent annual financial statements for the year ending December 31, 2019. Certain amounts in the prior period have been reclassified to conform to the presentation in the current period.

These consolidated financial statements were approved by the Board of Directors and authorized for issue on July 9, 2020.

7. Investment securities

In June 2019 Organto entered into a share purchase agreement to sell its shares of Medicannabis and related intellectual property ("IP") consisting of licenses and seed and cultivar rights to Xebra Brands Ltd. ("Xebra") for a combination of shares of Xebra, cash and forgiveness of debt. Xebra is an emerging, privately held Canadian cannabis company developing high-margin cannabis-based consumer products, with a major focus on cannabis-infused beverages.

Under the terms of the agreement, Organto, together with the former shareholders and certain advisers of Medicannabis, received a total of 10,000,000 common shares of Xebra, with Organto receiving 7,124,630 common shares and the former shareholders and advisers of Medicannabis receiving 2,875,370 common shares. The Company received shareholder approval and TSXV acceptance of this transaction in October 2019 and final completion of the transaction occurred in December 2019. Upon receipt of these Xebra shares in December 2019, the former shareholders and advisers of Medicannabis returned the 7,461,538 common shares of Organto previously issued as part of the acquisition of Medicannabis in November 2018 and these shares were cancelled.

Organto received cash proceeds of \$321,077 in July 2019. In addition to the cash proceeds, promissory notes of \$600,000 due by Organto to Xebra were forgiven and Xebra assumed all outstanding debts and obligations of Medicannabis. Organto was also granted a right of first refusal ("ROFR") to distribute Xebra's cannabis products throughout Europe. No value has been attributed to the ROFR given the uncertainty of when or if Organto can begin profitably distributing Xebra products in Europe.

As they are not publicly traded, fair value of the Xebra shares is estimated at \$0.30 per share, this being the price of the most recent funding involving financing from external investors.

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

8. Loan receivable

In March 2019, the Company entered into an agreement to sell the Company's processing plant and related assets, including land, buildings and processing equipment, located in Guatemala, to Organizacion de Marcadeo SA ("Omega"), a company controlled by one of the founding shareholders of Organto Guatemala, S.A., now a subsidiary of the Company.

Under the terms of the agreement, Omega acquired the assets on an as-is basis for consideration of \$935,450. Consideration was paid through the discharge of certain loans (see note 10) from Omega and related parties to Organto in the amount of \$428,782 (US\$314,647), cancellation of 5,873,257 common shares of Organto, and the assumption of an interest-free note payable from Omega in the amount of \$77,185 (US\$56,628), due on the second anniversary of the closing date and secured by a lien on the assets. The fair value of the shares to be cancelled was determined to be \$440,494, and the fair value of the loan payable was determined to be \$66,174. The loan receivable is being accreted to face value over the 2 year term.

A continuity of the balance is shown below:

	(\$)
Balance at January 1, 2019	-
Loan issued	66,174
Accretion	3,843
Foreign exchange	(3,066)
Balance at December 31, 2019	66,951
Accretion	1,356
Foreign exchange	5,992
Balance at March 31, 2020	74,299

9. Bank loan

In January 2019, the Company established a revolving credit facility with a Mexican bank for up to US\$500,000. Interest is payable monthly at 12% on any funds borrowed. Borrowed funds are required to be repaid within 180 days after which they can then be re-borrowed.

A continuity of the balance is shown below:

	(\$)
Balance at January 1, 2019	-
Proceeds	1,325,063
Payments	(660,220)
Foreign exchange	(13,949)

Proceeds	680,367
Payments	(680,367)
Foreign exchange	57,606
Balance at March 31, 2020	708,500

Accrued interest on this loan is recorded in accrued liabilities.

See also note 20.

organto

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

10. Loan due to Omega S.A.

As at December 31, 2018 the Company had a loan payable to Organizacion de Marcadeo SA ("Omega") in the amount of \$270,212 (US\$198,248).

This loan was partially settled when the Company sold its processing plant in Guatemala (see note 8). Under the terms of the sale agreement, part of the consideration paid was the discharge of US\$175,348 of the loan from Omega leaving a balance owing of \$30,320 (US\$22,900). The Company made a payment of US\$3,000 in October 2019 and the balance of US\$19,900 is payable within 5 business days after the Company completes an equity financing of at least \$200,000.

A continuity of the balance is shown below:

	(\$)
Balance at January 1, 2019	270,212
Loan settled	(238,999)
Payments made by the Company	(3,936)
Payments made by a related party	(1,952)
Foreign exchange	(1,375)
Balance at December 31, 2019	23,950
Foreign exchange	2,123
Balance at March 31, 2020	26,073

11. Short-term loans payable

During the year ended December 31, 2018 the Company received \$818,740 in bridge loans from insiders and certain shareholders. Interest rates ranged from 0% to 8% with interest paid in equal monthly payments totalling \$5,000 per month on all interest bearing loans. Two of these loans were settled in March 2019 when the Company sold its processing plant in Guatemala. Under the terms of the sale agreement, part of the consideration paid was the discharge of the loans from Omega with maturity dates of March 27, 2019 and April 5, 2019. All loans were unsecured and had a term of one year.

In April 2019 the Company entered into an agreement to extend the remaining bridge loans. Under the terms of the extension all outstanding amounts were extended one-year from the date of the initial loan and will be payable on the new expiry date. Commencing May 15, 2019 and each month thereafter, the Company was to make equal monthly payments of \$8,632 consisting of principal and interest and lump sum payments based on funds raised via equity financings, warrant exercises and proceeds from potential funds raised in relation to the Company's medicinal cannabis assets. If the Company completely exited its cannabis investment, any outstanding amounts due under these short-term loans would be immediately due and payable. One monthly payment was made in the first quarter of 2020 and as at March 31, 2020 amounts outstanding on these bridge loans total \$553,359. These short term loans were extended in April 2020 (see note 20).

During 2019 the Company received \$584,738 in short term loans from a number of parties including officers and directors, some of which are denominated and repayable in US dollars and Euros. Of these loans, \$419,100 are secured by a portion of the Company's investment securities and bear interest at an annual rate 12% for a term of six months. The other loans are interest free, unsecured and have no fixed terms of repayment. During 2019 the Company repaid \$94,085 of the interest free loans. In the first quarter of 2020 an additional \$346,922 was received from officers and directors of which \$280,515 was repaid. A total of \$2,834 in interest was accrued on these 2020 advances. In February 2020 the Company issued 2,135,764 warrants in connection with the \$419,100 of secured interest-bearing loans issued in late 2019. These warrants are exercisable for a period of 12 months at an exercise price of \$0.065 per share. In May 2020, \$74,550 of the secured interest bearing loans and \$161,150 of the unsecured non-interest bearing loans were settled by issuing convertible promissory notes (see note 20).

The Company signed promissory notes payable to Xebra for cash proceeds of \$114,000 in the first quarter of 2019. In the second quarter of 2019, the Company signed promissory notes payable to Xebra totalling \$486,000 in exchange for cash proceeds of \$396,731 and for Xebra making payments of \$13,150 directly to suppliers on behalf of Organto. These notes were non-interest

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

bearing and due on demand any time after May 7, 2019. Immediately prior to the sale of its subsidiary Medicannabis, \$55,000 of the short term loans from two directors as noted above and \$21,119 of expense reimbursements due to these directors were assumed by Xebra and then included in the \$600,000 of promissory notes forgiven by Xebra.

As all these loans are expected to be repaid in the near future they are recorded at their loan amounts which is considered to be a close approximation of their fair value.

Accrued interest is recorded in accrued liabilities.

12. Share capital

(a) Common shares

The Company is authorized to issue an unlimited common shares without par value.

At March 31, 2020 and December 31, 2019 the Company had 165,016,934 common shares issued and outstanding. Included in issued common shares are 5,873,257 common shares to be cancelled upon the completion of documentation pertaining to the sale of the Company's processing plant and related assets in Guatemala (see note 8).

See also note 20.

(b) Share options

The Company has adopted a rolling stock option plan whereby the Board of Directors, may from time to time, grant options to directors, officers, employees or non-employee service providers to a maximum of 10% of the outstanding common shares of the Company at any point in time, less any share options already reserved for issuance under share options granted under previous stock option plans of the Company or granted under any other employee incentive purchase plan that the Company may adopt. Options granted must be exercised no later than five years from date of grant or such lesser period as determined by the Company's Board of Directors.

The continuity of the Company's share options is as follows:

	Total opt	ions Weighted	Exercisable	options Weighted
	Total options ex	average ercise price (\$)	Exercisable options ex	average kercise price (\$)
Palanas January 1, 2010	12 420 000		C 422 017	·

0.20	0.43	1,275,000	1,275,000
	3.46	13,010,000	6,103,750

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

The Company recognizes stock based compensation over the vesting period of the underlying options using the Black-Scholes Option Pricing Model for those options with set vesting dates and the Binomial Method for those options which vest based on market conditions. Option pricing methods require the input of highly subjective assumptions including expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options granted and/or vested during the period. The fair value of the options granted in 2019 was calculated using the Black-Scholes model with the following inputs: expected price volatility of 117-120%, risk free interest rates of 1.31%-1.57%, expected life of 5 years and no dividend yield. The fair value of the options granted in 2018 was calculated using the Black-Scholes model with the following inputs: expected price volatility of 121-128%, risk free interest rate of 1.90%, expected life of 5 years and no dividend yield.

The Company recognized \$63,764 in the three months ended March 31, 2020 (2019 - \$87,469) as stock-based compensation expense.

(c) Warrants

In February 2020, the Company issued 2,135,764 warrants in connection with the \$419,100 of secured interest-bearing loans issued in late 2019. These warrants are exercisable for a period of 12 months at an exercise price of \$0.065 per share. The fair value of these warrants was insignificant.

Warrants are exercisable as follows:

		Exercise	
	Number	price	Expiration
Grant date	of warrants	(\$)	date
November 15, 2018 *	5,500,000	0.20	May 15, 2020
February 26, 2020	2,135,764	0.065	February 26, 2021
	7,635,764	0.162	

^{*} These warrants expired unexercised in May 2020.

The continuity of the Company's warrants is as follows:

	Number of warrants	Weighted average exercise price (\$)
Balance at January 1, 2019 Expired	51,590,378 (46,090,378)	0.17 0.16

20. Subsequent events

Secured interest-bearing loans

In April 2020 the Company entered into agreements to extend the secured, interest bearing loans of \$419,100 as follows: \$211,500 of the loans which were to mature in April 2020 and \$72,600 of the loans which were to mature in June 2020 will now mature on October 3, 2020 and December 13, 2020 respectively. The remaining \$135,000 of the loans which were to mature in April 2020 will now mature on July 3, 2020. No other changes were made to the terms of these loans.

In May 2020 the Company issued convertible promissory notes of \$74,550 to settle \$73,500 of the secured interest-bearing loans maturing in October 2020 and \$1,050 of associated accrued interest. In June 2020 the Company settled \$60,000 of the secured interest-bearing loans maturing in July 2020 as part of the June 2020 private placement and 1,200,000 common shares and

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

600,000 warrants were issued. See "Private placement" discussion that follows. On maturity in July the Company paid the remaining balance of \$75,000 and associated accrued interest.

Unsecured interest- bearing loans

In April 2020 the Company entered into an agreement to extend the unsecured, interest bearing loans of \$558,199 through March 15, 2021. In June 2020 the maturity date was further extended to October 1, 2021. These loans will now carry an annual interest rate of 12% and will be subject to monthly principal and interest payments in the amount of \$12,500 commencing the first month following the completion of the Company's convertible note financing. These loans are subject to additional lump sum payments based on funds raised via equity financings, warrant exercises and proceeds from funds raised from the disposition of the Company's investment securities. Subject to the acceptance of the TSXV, the Company will also grant 1.5 million warrants to the lender for a period through October 1, 2021 with an exercise price of \$0.065 per share.

Convertible note financing

In May and June 2020 the Company issued convertible promissory notes totalling \$2,075,300. These convertible notes are for a period of two years, carry an annual interest rate of 10 % (payable annually), and will be convertible into common shares of Organto at a price of \$0.05 per share for the first year and \$0.10 per share for the second year. If, after four months from the date of issuance of the convertible notes, the volume-weighted average closing price of Organto's common shares as traded on the TSXV is equal to or greater than \$0.15 for 10 consecutive trading days or more, Organto may, in its sole discretion, accelerate conversion of the convertible notes. There is no prepayment penalty. Any shares issued upon the conversion of the convertible notes will be subject to a hold periods expiring in September and October 2020.

Organto paid a finder's fee of \$22,330 in cash and issued 223,300 broker warrants in connection with these convertible notes. The broker warrants are for a term of two years with an exercise price of \$0.10 per share.

\$677,500 of these convertible notes were issued to settle the US\$500,000 Mexican bank loan. \$74,550 of these convertible notes were issued to settle \$74,550 of the secured interest-bearing loans and associated accrued interest. \$245,750 of these convertible notes were issued to settle \$161,150 of unsecured non-interest-bearing loans and \$84,600 of accounts payable.

Private placement

The Company issued 14,000,000 units for proceeds of \$700,000 in May 2020 and 16,077,900 units for proceeds of \$803,895 in June 2020. Each unit consists of one common share and one-half common share purchase warrant. Each full warrant entitles the holder thereof to acquire one common share at a price per warrant share of \$0.10 until May 2022 and June 2022. If, at any time after four months from the date of issue, the closing price of Organto's common shares as traded on the TSXV is equal to or greater than \$0.15 for 10 consecutive trading days or more, Organto may, in its sole discretion, accelerate conversion of the warrants. The 14,000,000 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in September 2020 while the 16,077,900 shares issued, as well as any shares issued upon the exercise of the associated warrants, are subject to a hold period expiring in October 2020.

Global Coronavirus Pandemic

In early 2020, China began reporting on the spread of the coronavirus and since then million of cases of the disease have since been identified around the world, including regions that are important to the Company's business in terms of sales, product supply and other aspects of its supply chain. The Company has continued to operate during the outbreak, with operations personnel working remotely for a period of time. Essential food supply chains have been maintained in these difficult times, although not without their issues due to logistics and labor challenges, and the Company has continued to work with its supply partners and customers to bring product to market. As the coronavirus pandemic plays out around the world, the full impact on the Company's business from this unknown at this time and difficult to predict. An extended pandemic outbreak or dramatic increase in actions taken by Governments to control transmission of the virus could cause the Company's key third party suppliers or the Company itself to temporarily close, which could lead to a shortage of raw materials and finished products. Also, if one or more of the Company's key customers were required to close for an extended period, the Company might not be able to ship products to

Notes to the Condensed Interim Consolidated Financial Statements For the Three Months Ended March 31, 2020 and 2019 (Unaudited – expressed in Canadian Dollars)

them, and consumers may decrease their level of purchasing activity, which would also adversely impact the Company's net sales. Any of the foregoing events or other unforeseen consequences could materially adversely affect the Company's business, results of operations, financial condition and/or cash flows.
